Triad-Orbit® O2X Boom: Four Arms Are Better Than Two

BEST IN SHOW InfoComm 2017

Seattle, Wash. (10-Jul-17) – Triad-Orbit® Advanced Stand Systems new Orbit O2X orbital boom took **Best in Show** honors at InfoComm in Orlando, FL on June 16, 2017.

“The unparalleled range of motion and precision of Orbit O2 dual orbital booms has inspired a new addition to the Triad-Orbit product line: Orbit O2X,” explained ACCESS Products Group’s Ryan Kallas. “The T-O Orbit 2 was the world’s first dual- arm, tri-axis boom. So, how do we improve on our flagship product? By adding more IO quick-change adaptability, IO-A modular boom arms connect to O2X ball swivels via our exclusive IO quick-change couplers. The O2X kit includes 4 IO-equipped telescopic boom arms; 2 long (IO-A1A) and 2 short (IO-A2A). The ability to custom-configure the O2X to any A/V task makes it the MVP in any producer, director or engineer’s precision miking toolkit.”
