Triad-Orbit Rolls Out T-O Cable Control™ At NAMM Show 2018

T-O Cable Control: Adjustable, Reusable, Sustainable Cable Management

Kingston, Wash. (1-1-2018) – Triad-Orbit will showcase T-O Cable Control, its novel cable management product, at NAMM Show 2018 in Anaheim, CA, January 25-28, 2018 at booth 14822 / Hall A. T-O Cable Control offers an innovative alternative to wire ties and hook & loop wraps for organizing and securing cable on stands, pedalboards and rack mounted devices.

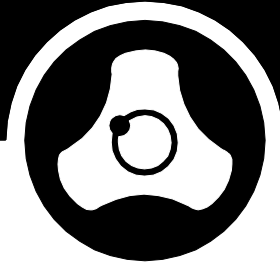

T-O Cable Control wraps are made of a semi-rigid 10-mil PET braid, a by-product of recycled soda bottles. Available in three diameters, the overlapping design and form-fitting shape of T-O Cable Control offers secure retention and fluid, adjustable movement of cables that is not possible with traditional wire ties and hook & loop wraps.

“Most braided PET products exhibit frayed edges after they’re cut to size,” said Marty Harrison of ACCESS. “We’ve added value and a longer lifespan to T-O Cable Control by sewing vinyl trim on the exposed edges and a rubber pull tab for easy installation and removal. T-O Cable Control is pure Triad-Orbit; another product reinvented and reinvigorated.”
